Customer testimonial

- FM LOGISTIC -

FM Logistic, logistics leader, chose Cimsup reactivity in co-packing and co-manufacturing industries

In the market for fifteen years, **Cimsup responds to issues** of industrial businesses, trading and distribution.

Edited by Agilya, **Cimsup solutions allow their clients to increase their efficiency**, control the environment changes and evolve to new technology concepts while preserving their investments.

Cimsup combines ergonomics, user productivity and advanced features.

High value-added services provider, FM Logistic offers its clients production systems with delayed differentiation: co-manufacturing and packaging to order. They can differentiate the product at the end of production chain depending of its consumption and significantly reduce the finished products stock and therefore customer costs.

FM Logistic choses Cimsup manageability

FM Logistic was looking for a production control tool with great flexibility **to manage short production cycles** integrating traceability constraints (creation and traceability of logistic shipping units (SSCC number)), tools or workshop changes, rotation of type of production, fast integration into customer and FM Logistic environments (EDI, SAP interfaces, Oracle, ..), ...

*« We chose Cimsup software for its flexibility and ergonomics especially adapted to the logistics constraints related to our business that requires exceptional responsiveness. »
said Olivier Faure, FM Logistic Manager of information systems.*

Cimsup is operational on the production sites of Orleans and Fontenay-Trésigny sites dedicated to co-manufacturing (January 2000), of Brumath (early 2001), Crepy en Valois (June 2001), Moulin-les-Metz (January 2002),...

Cimsup is interfaced with existing warehouse management and inventory management systems, developed by FM2I. FM Logistic uses Cimsup in the packaging division, one from the three FM Logistic main activities (about a third of its sales). On the sites of Orleans and Brumath, Cimsup permits, in the phone industry, the traceability of both SIM card and associated phone, from the palette to the final assembly of co-packing operation. **Cimsup permits to follow time**, cost and consumption of raw materials and their need for replenishment. The site of Fontenay runs through Cimsup the production of one of the market leaders in photography industry (production to order).

Products offers

The main offer

drives business functions, purchasing, production and stocks.

In addition, Agilya Solutions propose two vertical Pre-Packaged offers

Cimsup Packing :
